Lab Testing Equipments

Lab Testing Equipments are manufactured from high grade stainless steel and mild steel material. In addition to this, lab equipments are equipped with computerized panel, digital panel screen and magnetic sensor. These are provided in varieties of types that include hot air oven, digital cohesion valve meter, moisture analyzer and weighing balance. Pocket conductivity meters provide digital reading with fast & accurate speed. Moreover, conductivity meter equipments have PVC body frame, light weight, pocket-friendly and equipped with ring probe system. Lab Testing Equipments are used at numerous industry that includes food processing, photography, paper, animal husbandry and institute & college labs. Glass and plastic beakers are provided in different measurements viz. 10ml, 25ml, 50ml, 100ml, 1l and 2l with perfect completion.
